Before the paragraph beginning at line 27 of page 5 insert the following:

DETAILED DESCRIPTION OF THE INVENTION

IN THE CLAIMS:

Please amend claim 6 as follows:

6. (amended) A device according to claim 1, characterized in that the sleeve element (4) is formed with at least one passage (18) to the chamber (12; 34), which is to accommodate the well fluid.

Please amend claim 7 as follows:

7. (amended) A device according to claim 1, characterized in that the releasable and displaceable housing element (7), or the fixed housing element (30), is provided with means (19, 20) for transferring hardenable sealing substance to the annular chamber (9), when the releasable and displaceable housing element (7) or the annular
5 piston (31), is displaced along the housing element (4), and an associated valve unit (21).

Please amend claim 9 as follows:

9. (amended) A device according to claim 1, characterized in that the packer element (8) by the intermediate fixed housing element (6) is connected to a packer sleeve element (26) which is releasably and glidably arranged between the housing

element (4) and said fixed housing element (6).

Please amend claim 10 as follows:

10. (amended) A device according to claim 1, characterized in that the fixed housing element (50, 51) the most distant from the releasable and displaceable housing element (7), or the fixed housing element (30) with the annular piston (31), is formed of a lower housing element (50) fixedly arranged on the sleeve element (4), and an
5 upper housing sleeve element (51) which is releasably and slidably arranged externally on the lower housing element (50).

Please amend claim 13 as follows:

13. (amended) A device according to claim 1, characterized in that the tool has an accumulator (23, 24; 52) arranged thereto, said accumulator (23, 24; 52) being charged by means of the hardenable sealing substance which is transferred to the annular chamber (9) to inflate the packer element (8).

Please amend claim 15 as follows:

15. (amended) A device according to claim 1, characterized in that the tool has at least one mixing pipe (27) arranged thereto, for the hardenable sealing substance which is transferred from the releasable and displaceable housing element (7), or the fixed housing element (30) with the annular piston (31).

Respectfully submitted,

ANDRUS, SCEALES, STARKE & SAWALL, LLP
